Manufacturer	Step 1	Step 2	Step 3	Step 4	Step 5	Step 6
	<p>Contact the hotline : France +33 139331233 Austria (English) +43 72422415670 or send an email to pv-support-france@fronius.com</p> <p>If installer is FSP (Fronius Service Partner), the request can be fill in online via SOS Fronius.</p>	<p>No online form to fill in, everything can be organized through the phone or by emails.</p> <p>If the device needs to be replaced, Fronius sends an email confirmation with a PDF file explaining the procedure to follow in order to send back the defective material (DHL Express).</p> <p>/!\ The installer must have a customer number at Fronius (if not, he will receive a link to create an account).</p>	Reception and installation of the new device.	<p>The installer must send the defective unit back to Fronius (following the instructions received by email) within 30 days. If the deadline is exceeded, the material will be invoiced.</p> <p>In case of trouble, contact pv-service-france@fronius.com with pv-support-france@fronius.com in copy.</p>	<p>The defective unit is analysed by Fronius.</p> <p>If Fronius is responsible of the problem, the installer will receive a financial compensation (between 75€ and 125€).</p> <p>If the problem is from an external origin (lightning, overvoltage, installation defect, ...), the repair of the device is invoiced to the installer.</p>	Invoice the financial compensation within 2 months after the reception of the 0€ invoice from Fronius.
	<p>Contact EVBox by phone at +32(0)3/303.44.04</p>	<p>EVBox analyses the request and creates a ticket (the ticket number is communicated to the client).</p> <p>Level 1 support analyzes the situation and contact the client in order to find solutions.</p> <p>If the problem can't be solved on the phone : step 3.</p> <p>If the problem can be solved on the phone : end of the procedure.</p>	A technician comes on site with the necessary spare parts.	/	/	/
	<p>If an installer suspects a faulty product, he should contact support either by e-mail (support@smappee.com) or by telephone (056 38 02 11). Smappee will analyse the case and check with the installer that the bollard is indeed faulty.</p>	<p>If the charger or a component is faulty, the installer will receive an RMA ticket by e-mail with a document (https://smappee.zendesk.com/hc/article_attachments/13248836816276) that he must fill in with the bollard's details and the reason for the return. He can then either organise a pick-up at his premises by providing us with details of the location. The RMA sheet must be stuck to the charger box.</p>	Smappe returns a charger as soon as it has received the details. No need to wait for the terminal to be returned to Smappee.	Please note that if the charger returned is not actually faulty but has been incorrectly installed, the charger will be returned and the charger under warranty will also be invoiced.	/	/
	<p>Consult the Smart Assistant on the website, or here: https://help.easee.com/fr The support number, for installers only, is available in the Installer App. They are available by phone between 09.00 - 15.00 on weekdays.</p>	Charging systems are equipped with an E-SIM card, which is activated by default and free of charge for the life of the charger, so we can carry out remote troubleshooting. In 98% of requests for assistance, we solve the problem without calling in an on-site installer.	If you have not contacted the service by telephone, fill in a ticket on https://support.easee.com/hc/fr/requests/new .	The support team will provide appropriate remote assistance. The Easee/Equalizer must be powered up and the serial number retained.	The support team will diagnose the problem and provide you with the procedure for obtaining a new charger. Do not replace the appliance without prior authorisation. The warranty could be refused.	/
	<p>When a breakdown is suspected. You can call the following numbers: +32 2 808 8828 +33 1 76 46 09 15 You can also create a ticket: https://support.wallbox.com/en/contact-us/ Ecotal also has pdf files to complete for these tickets.</p>	Wallbox communicates with you by proposing solutions.	If the charger is diagnosed as faulty, a new one is supplied by Wallbox and the old one is taken back.	/	/	/

Manufacturer	Step 1	Step 2	Step 3	Step 4	Step 5	Step 6
peblar	Ecotal is the first line to contact in the event of a breakdown. We'll try to help remotely. Requires serial number, firmware version and any error code.	If Ecotal cannot find a solution. We will create an RMA ticket. If Peblar cannot solve the problem remotely, the terminal must be sent back to Peblar for analysis.	If the fault is covered by the warranty , the charger will be repaired/changed at Peblar's expense.	/	/	/
